

Planning Example - floor space required 215 cm x 215 cm

Planning Example - floor space required 215 cm x 215 cm

Build your STUDIOBOX

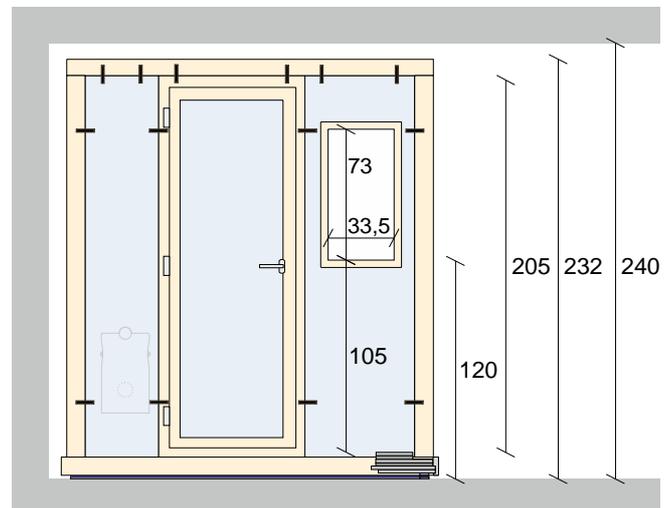

First of all, you measure the existing room (length x width x height).

Make a simple drawing by indicating the room design, the positions and dimensions of:

- existing room (length x width x height)
- existing doors and windows
- heating pipes
- projections on the wall e.g.

Planning Example

necessary room height for installation 240 cm, standard interior height 205 cm

Possibly mark the desired position and approximate dimensions of the sound booth. A planning aid is on offer. Please do not forget to inform us about the application fields. Send your sketch to info@studiobox.de. We will get back to you with a customized proposal.
